

Building Committee Survey - 2009

1. What do you like best about the current space at Prince of Peace that you use for your ministry?

We can always find some room/space to meet.

2. What (if anything) makes you feel we need some more space?

Last Christmas service when there weren't enough seats for people during the service....otherwise it seems ok for now.

3. Is your ministry limited by our current space?

No

4. What would make Prince of Peace a more welcoming space?

Don't have any suggestions

5. How can we improve our church's visibility?

I'm actually surprised how many people don't really notice the building. When I tell them where we go to Church they always think it's the little historical church or the one next door to that. I think a better sign would be helpful.

6. In what ways could your future ministries be improved by adding or changing our current space?

Don't know about this one...

7. Where to you feel our/your ministry will be in 5 years?

Hopefully bigger.

8. What would make your space more comfortable?

I think it is fine now

9. Do you have any ideas for better utilizing the space we have outside our buildings?

I think it would be nice to do something with the green space next to 28. Again, maybe something with a better sign.

10. Would any of your suggestions change if we evaluated them from an environmental perspective?

No.
