

Building Committee Survey - 2009

1. What do you like best about the current space at Prince of Peace that you use for your ministry?

Everything I need to do my job is in a convenient location.

2. What is it that makes us feel we need some more space?

Continually 'rearranging' the space to try to make it feel less cluttered

3. In what way is your ministry limited by our current space?

Limited storage space. ^{in closet + copier room - consolidate} Copy room is small and

hard for more than one person to work in. Even ^{Also} one person has trouble with cabinet doors open. ^{See} #8.

4. What would make Prince of Peace a more welcoming space?

A bigger fellowship hall + narthex. A ^{better marked} ~~clear~~ entrance to the building.

5. How can we improve our church's visibility?

Better signs in front. The building seems to be hidden from the street. Grade the front lawn lower

6. In what ways could our future ministries be improved by adding or changing our current space?

More possibilities for large gatherings if the fellowship hall + kitchen were larger.

7. Where to you feel our/your ministry will be in 5 years?

?

8. What would make our space more comfortable?

I would like to see an office suite with all the staff closer to each other and perhaps a small conference room for meetings (just dreaming :) with A/V equipment.

9. Do you have any ideas for better utilizing the space we have outside our buildings?

Instead of 2 or 3 sheds, perhaps a 'barn-like' structure could be built for storage.

10. Would any of your suggestions change if we evaluated them from an environmental perspective?
