

Building Committee Survey - 2009/2010

1. What do you like best about the current space at Prince of Peace that you use for your ministry?

2. What is it that makes us feel we need some more space?

Easter & other special days require temp seats in the narthex.

3. In what way is your ministry limited by our current space?

Enlarging the sanctuary would address several issues

- Difficulty walking around between the pews & organ
- Facilities for the choir & musical presentations
- Re-do the interior to be more traditional: ~~the~~ more stained

4. What would make Prince of Peace a more welcoming space?

glass, religious artifacts, etc. Fixed pews would help.

5. How can we improve our church's visibility?

If the building is enlarged, add a bell tower with a traditional cross. Regular church bells are a welcoming sound. Also a professional stone welcome sign on the road would be an attention-getter.

6. In what ways could our future ministries be improved by adding or changing our current space?

Our physical layout is confusing - visitors may not know there is parking in the back and which door is the right one to enter.

7. Where do you feel our/your ministry will be in 5 years?

8. What would make our space more comfortable?

Fixed Pews.

9. Do you have any ideas for better utilizing the space we have outside our buildings?

10. Would any of your suggestions change if we evaluated them from an environmental perspective?

No
